Acknowledgement

Receipt is acknowledged of the Amendment filed January 31, 2006.

Election/Restrictions

Applicant's argument on second restriction requirement was persuasive. Therefore, Claims 33-37 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the Office action mailed on September 7, 2005 is hereby withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Justin Liu on February 8, 2006.

The application has been amended as follows:

Claims 34, 35, and 37 have been canceled.

Claim 36, line 1, the number "35" has been deleted and replaced by --33--.

Replace the Claim 33 with the following:

/

Art Unit: 2819

33. (currently amended) A programmable logic device comprising:

a first voltage supply terminal configured to receive a first supply voltage;

a plurality of programmable logic blocks, each programmable logic block comprising one or more resources of the programmable logic device; and

a plurality of voltage regulators, wherein each voltage regulator is coupled between one of the programmable logic blocks and the first voltage supply terminal; and

a control circuit coupled to each of the voltage regulators, wherein the control circuit is configured to provide a plurality of control signals for controlling the plurality of voltage regulators,

wherein the control circuit comprises a plurality of configuration memory cells configured to store a corresponding plurality of configuration data values, wherein the control circuit provides the plurality of control signals in response to the plurality of configuration data values, and

wherein the plurality of configuration data values identify unused programmable logic blocks determined at design time.

Reasons for Allowance

Claims 26, 27, 30, 32, 33, 36, and 38-40 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Houston, taken alone or in combination of other references, does not teach or fairly suggest a programmable logic device comprising, among other things, a control circuit that

Art Unit: 2819

comprises a plurality of configuration memory cells configured to store a corresponding plurality of configuration data values, wherein the control circuit provides the plurality of control signals in response to the plurality of configuration data values, and wherein the plurality of configuration data values identify unused programmable logic blocks determined at design time (claims 26 and 33), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
